This application is in condition for allowance except for the following formal matters:

Claims 2 and 6 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 2 and 6 do not limit the subject matter of the independent claims 1 and 5. Independent claims 1 and 5 are directed to the Embodiment 1 (Fig. 1) which comprises a scattering member 106 arranged only (but not in said first region) in at least part of the transmissive region 102. However, claims 2 and 6 are directed to the Embodiment 2 (Fig. 2) which comprises scattering members (201, 202) arranged in both transmissive and reflective regions (102, 103). Embodiments 1 and 2 are mutually exclusive. In other words, if there is a prior art discloses the Embodiment 2, that prior art *cannot* be used to reject claims 1 and 5 because claims 1 and 5 recite “a scattering member arranged only (but not in said first region) in at least part of the transmissive region”.

Claims 1 and 5 are allowed over the prior art of record because the prior art disclose either “a scattering member arranged *only* in at least part of the *reflective* region” or “a scattering member arranged in both transmissive and reflective regions”.

Claim 3 is allowed over the prior art of record because none of the prior art discloses or suggests a transfective liquid crystal display device having a second substrate comprises a first color filter having a scattering effect arranged in the transmissive region and a second color filter (without scattering effect) arranged in a

second region corresponding to said reflective region. Claim 4 is also allowed since it depends on the allowed claim 3.

Claim 7 is allowed over the prior art of record because none of the prior art discloses or suggests a method of transfective liquid crystal display device comprising the step of "arranging a first color filter having a scattering effect *only* in at least part of the transmissive region of said second substrate".

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
